

Example source code log: AbstractCommandTag.java

Exhibit B 09/882,525

```
E:\>cd filelog -i -l //server/mainline/common/src/com/lightsurf/taglib/AbstractCommandTag.  
java  
//server/mainline/common/src/com/lightsurf/taglib/AbstractCommandTag.java
```

add page identifier to form validation identification;
removed formName as parameter to verify method for form command tags

```
AbstractCommandTag.java#11  
... #10 change 7233 edit on 2001/01/03 by pegli@pegli-tags (text)
```

redirects to the client.

```
... ... copy into //server/external/netkraft/common/src/com/lightsurf/taglib/  
AbstractCommandTag.java#10
```

Code merged from NK to mainline

```
... ... copy from //server/external/netkraft/common/src/com/lightsurf/taglib/  
AbstractCommandTag.java#9
```

added javadoc comments

```
... ... copy into //server/external/netkraft/common/src/com/lightsurf/taglib/  
AbstractCommandTag.java#8
```

migrating to log4j logging tool-kit

```
... ... copy into //server/external/netkraft/common/src/com/lightsurf/taglib/  
AbstractCommandTag.java#7
```

Code Integrated from NK to Mainline

```
... ... copy from //server/external/netkraft/common/src/com/lightsurf/taglib/  
AbstractCommandTag.java#6
```

removed printStackTraces - often replacing with logging with exception stack trace
output;
this work is for release/production roll-out

```
AbstractCommandTag.java#5  
... #4 change 6159 edit on 2000/12/01 by bmccanlies@bmccanlies-w2k (text)
```

changes to separate validation package from taglib package

```
AbstractCommandTag.java#4  
... #3 change 6119 edit on 2000/11/30 by tatkings@horsey (text)
```

changes to support move of KeyUtil into taglib package

```
AbstractCommandTag.java#3
```

... #2 change 5906 edit on 2000/11/27 by bmccanlies@bmccanlies-w2k (text)

initial bug fixes

... .. copy into //server/external/netkraft/common/src/com/lightsurf/taglib/
AbstractCommandTag.java#2

Great Renaming to bring all files under the //server namespace

1) Integrate all code into the server repository

p4 integ //lightsurf_v2/... //server/legacy/lightsurf_v2/...

p4 integ //server/photosurf_tag/lightsurf/... //server/mainline/common/...

p4 integ //server/photosurf_tag/photosurf_jp/... //server/mainline/photosurf_jp
/...

p4 integ //server/photosurf_tag/picturecenter/... //server/mainline/

p4 delete //server/photosurf_tag/...

p4 submit

... .. branch into //server/external/netkraft/common/src/com/lightsurf/taglib/

... .. branch from //server/photosurf_tag/lightsurf/src/com/lightsurf/taglib/
AbstractCommandTag.java#1,#11

... #11 change 5774 edit on 2000/11/21 by bmccanlies@bmccanlies-w2k (text)

first check-in of taglibs for form validation

java#1

... #10 change 5568 edit on 2000/11/15 by bmccanlies@bmccanlies-w2k (text)

restored previous version - had mistakenly checked in file

moved files from com.lightsurf to com.lightsurf.validation

... #8 change 5158 edit on 2000/11/07 by tatkins@travis (text)

... #7 change 4738 edit on 2000/11/01 by pegli@pegli-tags (text)

removing debug code from AbstractCommandTag

removed some unnecessary code from AbstractCommandTag

... #5 change 3570 edit on 2000/09/27 by tatkins@travis (text)

dependancies

... #4 change 3041 edit on 2000/09/14 by pegli@pegli-tags (text)

updating bean setting methods to allow parameter types other than String.

... #3 change 3040 edit on 2000/09/14 by pegli@pegli-tags (text)

fixed problems with edit photo information page

... #2 change 1571 edit on 2000/08/15 by pegli@pegli-tags (text)

... #1 change 1188 branch on 2000/08/09 by pchitturi@pchitturi (text)

Created photosurf_tag branch .
